TECHNOLOGY

Freddo

THE SKIN REFRIGERATOR WITH THE BEST PERFORMANCE IN THE MARKET

A patient without pain is a satisfied patient.

Freddo provides relief and satisfaction for the patient and more success during the treatments.

Its success ratio jet cold air in contact with the skin, generates an analgesic effect, allowing the patient to be treated.

HIGH PERFORMANCE

Freddo

Skin refrigerator widely used in the area of dermatology and vascular surgery, with more than 2,500 units. It is the only device that can work for hours at a time, uninterruptedly. This performance is obtained through the choice of the best materials and suppliers on the market but mainly through its patented self-drying system.

EXCLUSIVE: patented self-drying system. Does not require daily removal of condensed water from the equipment.

- Produces extremely cold air;
- Cools much more with less energy consumption;
- Compact, usable under any stretcher;
- No need to remove water (patented system);
- Easy to transport;
- No consumables.
