Patented automatic drying system!

0,56 kW

Max. power consumption during therapy!

READY TO USE

In 5 minutes!

NO CONSUMABLES

Less costs!

H 28" / W 19" / L 20"

Housing dimensions.

120 lbs (55 kg)

Weight.

PROMPT DELIVERY

We work with reliable carriers!

*Optional articulating arm.

THE ULTIMATE PLUG & PLAY !

UNCOMPARABLE EFFICIENCY WITH LOWER ENERGY CONSUMPTION

Freddo offers the same cooling power with less energy consumption. Designed for maximum efficiency, the equipment produces cold air up to -35°C through the hose, ensuring maximum productivity while minimizing energy consumption, effectively doing more with less energy used.

PATENTED AUTOMATIC DRYING SYSTEM

Unlike other skin cooling machines, Freddo does not require to daily empty the condensed water, nor does it have any leaks or liquid build-up. This unique patented system offers exclusive convenience and efficiency.

NO CONSUMABLES - LESS COSTS AND MORE PRACTICALITY

Freddo is a cryotherapy system without consumables such as condensation collectors or filters. Designed as a plug & play solution, it is easy to operate and repair, eliminating recurring costs and bringing greater savings over time.

PROMPT DELIVERY - THE AGILITY YOU NEED

We know that when purchasing equipment, professionals want to start using it without delay. Our equipments and spare parts are available for immediate delivery, whenever necessary.

USER FRIENDLY CONTROL PANEL

We developed an intuitive panel with only four buttons: On/Off, Play/Pause, Timer and Airflow.

This means fewer distractions and more time dedicated to patient treatment, whether adjusting the parameters of a laser device or performing procedures such as botulinum toxin application and fillers.

Orange flat tip:

Especially useful for sclerotherapy.

White fine tip:

Useful for working with laser or IPL (does not absorb light energy).

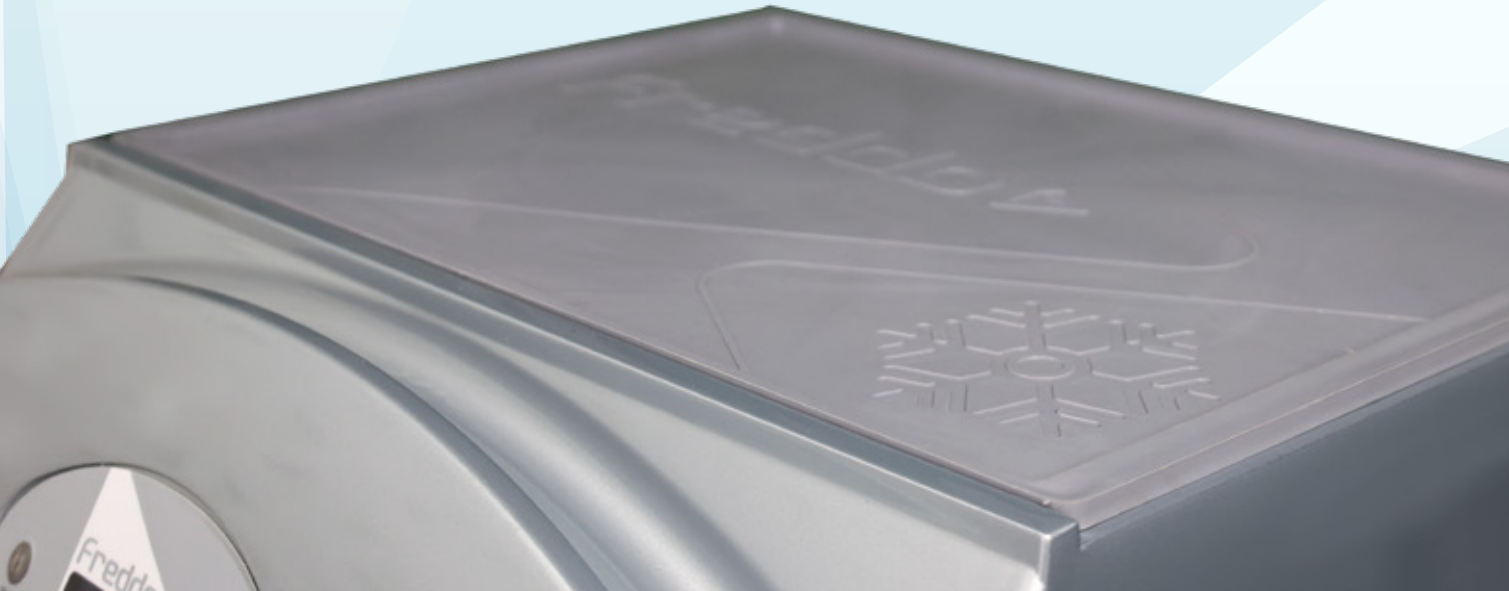

READINESS AND EFFICIENCY

With a simplified panel and a few keys, Freddo is ready to use in just 5 minutes after turning it on.

This agility allows professionals to focus on their patients, not on the equipment.

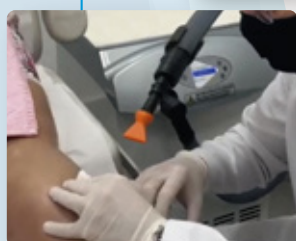

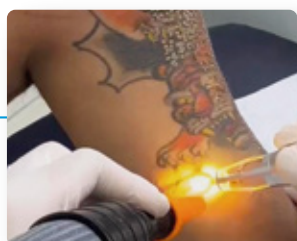

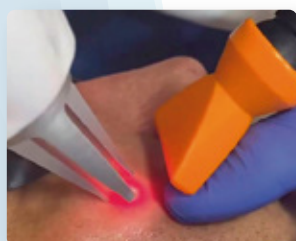

NO GLASS TOP: MORE SAFETY AND PRACTICALITY

Glass breaks! Our platform is robust and allows us to accommodate other therapy devices and small accessories, without unnecessary risks.

LOW MAINTENANCE DESIGN

Freddo was designed with low maintenance in mind, with durable materials and easy-to-access components, allowing for less time and effort spent on maintenance tasks. By removing just six screws, it is possible to access all internal parts, ensuring faster and lower-cost repairs, while competitors use modules fixed with rivets, which makes the repair process longer and more expensive.

*Optional articulating arm.

SUSTAINABLE AND ENVIRONMENTALLY FRIENDLY

All Freddo components are 100% recyclable, contributing to the preservation of the planet and benefiting future generations.

FREDDO IS ASSEMBLED AND TESTED AT OUR FACTORY IN WINTER PARK, FLORIDA.

You are welcome to contact us and schedule a visit to our factory.
